Prime Design single horizontal rotation ErgoRack™

Operates safely from the rear of the vehicle

Easy ergonomic operation

*Prime Design
locking ladder rack
with step ladder option*

EASY DOES IT

The ErgoRack™ by Prime Design is designed to minimize the physical stresses involved in loading and unloading heavy, bulky ladders. The single horizontal rotation positions ladders for easy access. ErgoRack™ reduces lower back and shoulder stress by eliminating the need to step on the bumper or tailgate to access a ladder. The lightweight design is lighter than steel ladder rack solutions for improved gas mileage and savings. Lockable security feature reduces theft at the job site and on the road.
