SEAT COVERS THAT WORK

WHAT'S IN IT FOR YOU.

Return On Investment

A vehicle with a perfect interior looks like a well maintained vehicle and sells for more when you're done with it.

Comfort

Nobody likes sitting on a ripped up, broken down seat with springs poking out. Our covers stay in place to keep the seats intact and help maintain their shape. They're breathable too, meaning that you won't sweat (or freeze) your tail off. This keeps your drivers comfortable, and comfortable drivers are happier drivers. Happier drivers take better care of their equipment.

Safety

What does any of it mean if your safety is impaired? We think not much. Our seat covers have been tested and certified by MGA Laboratories to be airbag compatible. We've got the video to prove it - ttcovers.com/ttairbag.

Quality

TigerTough seat covers are one of the few brands that are specifically for work trucks. We've designed our covers to stand up to the daily abuse that work trucks get. Every seat cover we build is precision cut, double stitched, and hand inspected. Why do we go to so much work? Because letting you down isn't something we're cool with.

Warranty

We believe in our quality and stand behind it. That's why we back it up with the best warranty in the industry. Our covers have a two-year, unconditional, no B.S. warranty. If you break it, we'll fix or replace it. It's that simple.

Headrest is covered and remains independent for comfort and safety.

Independently verified to comply with in-seat airbags.

Seams are double stitched for strength and durability.

Custom logo embroidery available.

Keep all your factory features! You won't lose any seat functions or storage space.

Fits like a second skin.
